AMINAT AFOLABI

Product Manager
Lagos, Nigeria | +234 816 768 7659 | afolabijolayemi@gmail.com
LinkedIn | GitHub | Portfolio

SUMMARY

Product Manager with a software engineering background, building AI-powered products and improving user experiences across edtech and fintech. Experienced in product discovery, translating user insights into clear requirements, and partnering with engineering to deliver and scale products. Combines technical understanding with user-focused product decisions, from prioritisation and edge cases to QA and launch readiness.

EXPERIENCE

Conclase Lagos, Nigeria
Product Manager Jan 2026 – Present

- Contribute to product strategy, roadmap and delivery for StacStart, an AI-powered talent platform bridging learning and employment across Nigeria, Kenya and Uganda through its Learning Management System (LMS) and StacStart Jobs.
- Led the rebuild of the StacStart LMS for the iDICE Skills to Jobs programme, commissioned by the Bank of Industry, adapting the platform to support 50,000+ users across Northwest Nigeria while maintaining the existing academy experience.
- Contributed to the development and scaling of StacStart's learning and job application experiences, which have supported 10,000+ users, translating business and user needs into product requirements and collaborating with engineering through implementation.
- Product-managed the Borderless Bytes Hackathon judging and results platform for 323 developers across four countries, handling 96 submissions and 288 judge scores with written feedback and private team results.
- Managed product delivery for external client projects, including the Pitchigh LMS, translating client requirements into product specifications and coordinating implementation.
- Transitioned the software development workflow to Jira to improve visibility into delivery, ownership and blockers. Named Staff of the Quarter for Q2 2026.

Mimuads AI Lagos, Nigeria
Co-Founder (Product) Oct 2025 – Present

- Co-founded a self-serve marketplace that turns idle screens in pharmacies, eateries and high-dwell venues into ad inventory; brands pay only for human attention verified by on-device computer vision, with no agency retainers or minimum spend.
- Validated venue supply before building the booking engine, ran separate research for hosts and advertisers, and designed host-first economics: free installation, the larger revenue share and weekly payouts.
- Live with an iOS and Android app, a self-serve campaign dashboard and a screen player that keeps running through network drops; ads go live within 24 hours, and a supply-side API for agencies is in early access.

Splexxlabs Remote
Product Manager (Freelance), Nodecademy Apr 2026 – Aug 2026

- Led product development for Nodecademy across its public-facing website, application tracking and payment workflows, and Learning Management System (LMS), mapping end-to-end user journeys across these connected experiences.
- Conducted user research with internal tutors, translated business and user needs into PRDs and acceptance criteria to guide engineering, and supported product scaling as the platform grew to 50+ users.

SELECTED BUILDS

- **Nevara, Product Lead (Runner-up, ALAT by Wema Buildathon 2026):** Built a group payment collection solution using ALATPay's Bank Transfer API, unique virtual accounts and webhooks for real-time payment tracking. Led product strategy, the collection workflow and the pitch.
- **Zuri, Product Lead (Monnify x API Conference Lagos Developer Challenge):** Led product direction for a multilingual, voice-first money assistant with real account integration and transaction verification, shipped in under a week.

LEADERSHIP

- **GDG on Campus, University of Ilorin, Co-Lead Organizer (2024 – 2025):** Grew membership by 40%, helping establish the chapter as the largest GDG on Campus chapter in Sub-Saharan Africa. Co-led CareerFest X TechSummit, attracting 2,600+ attendees and coordinating 100+ volunteers.
- **She Code Africa, University of Ilorin, Pioneer Chapter Lead (2023 – 2025):** Built the chapter to 350+ members.
- **Additional leadership:** Team Lead, Tech Revolution Africa 3.0; Technical Lead, GirlsTech.
